Senior learning and change professional with 8+ years of experience designing enterprise learning, technology adoption, onboarding, and workforce capability programs. Currently lead learning design and change support for AI and Automation initiatives, translating complex technology into practical, role-relevant experiences that build readiness, confidence, and adoption. Proven success building programs from the ground up, supporting audiences of 10,000-20,000+ employees, improving training adoption from 23% to 92%, and partnering with senior leaders, product teams, SMEs, and change partners across large distributed organizations.

Professional Experience

Senior Learning Designer & Change Manager for AI & Automation

HUB International | 2026 - Present

- Lead learning strategy and architecture for enterprise AI and automation initiatives, translating complex and emerging technologies into practical learning experiences that build employee capability, confidence, and adoption.
- Partner with AI product owners, program leaders, business stakeholders, and change partners to identify capability gaps, assess readiness, and develop role-specific learning pathways aligned with transformation goals.
- Design scalable enablement across vILT, eLearning, videos, job aids, user guides, assessments, learning pathways, and performance support for employees across roles and AI literacy levels.
- Integrate learning and change approaches across AI initiatives, using employee feedback, Change Champions, adoption measures, and continuous iteration to improve readiness and learning effectiveness.
- Use Claude and other generative AI tools for research, analysis, prototyping, content development, and stakeholder communication while modeling effective AI work practices.

Senior Learning Experience Designer

HUB International | 2025 - 2026

- Led enterprise AI learning enablement supporting 20,000+ employees, establishing curriculum and adoption resources that guided practical and responsible use of generative AI.
- Designed and launched a scalable new-hire learning program supporting 10,000+ employees and increasing hands-on learning engagement by 60%.
- Improved training adoption from 23% to 92% by redesigning learning experiences around learner needs, practical application, and stakeholder alignment.
- Partnered with senior leaders, change teams, and SMEs to translate emerging technology and business initiatives into scalable learning solutions.

Learning Experience Designer

HUB International | 2023 - 2025

- Designed enterprise learning programs across virtual instructor-led, facilitator-led, eLearning, video, and performance- support modalities.
- Developed English and French curricula for system migrations and technology transformations impacting 10,000+ users.
- Created job aids, quick reference guides, videos, and digital learning resources supporting workforce readiness and technology adoption.
- Applied ADDIE, SAM, adult learning principles, and iterative design to build scalable solutions for complex enterprise initiatives.

Learning & Development Specialist

Rogers Public Schools | August 2018 - May 2023

- Designed and implemented learning programs supporting organizational change, professional development, onboarding, and workforce capability building.
- Developed 50+ learning assets, including eLearning modules, virtual training sessions, facilitator-led programs, assessments, and performance resources.
- Partnered with departmental SMEs to identify learning gaps, develop targeted solutions, and evaluate learner outcomes and program effectiveness.
