

How To Change Monitor Display Settings

1. Open the **Windows App**.
2. Select the **ellipsis** by the connect button.
3. Select **Settings**.

4. Select the **button to turn OFF the default settings** in the panel. The display settings will auto-populate below.
5. Select **"Select displays"** from the Display Configuration dropdown menu.
6. Select the **screen number** you want the HUB Cloud Desktop to appear on. A blue screen indicates it is selected.
7. Be sure to **turn all of the buttons ON**.
8. Select **X** to exit the panel and save your display changes.
